

We are a group of small inventors. We may not be able to say more about TRIPS and other big issues. But we are bringing one important issue to the notice of Honorable Ministry . We have understood for the last 5-10 years while filing applications that the Examiner of Patents and Designs are the backbone of IPO system. But this days the number has come down to very very small. Our applications are not examined for long long time. While interacting with officials we understood they don't got promotion. But we also understand that more promotions means less examiners and thereby less and less examination. We also understand burden on government . In future also the government have to employ examiner of patents & designs. Hence a some new post like Junior Examiner and Senior examiner should be created so that the officers get promotion and also the number of examiner of patents and designs do not get decreased in future. We have got this idea after visiting the websites of big Patent Offices from Internet. This will help government also, otherwise Honorable ministry has to always think about Examiner of Patents and Designs and other issues helpful for us will not get importance. So senior officials from ministry please kindly look into this proposal.

Sincerely ,
Group of Inventors.
